### **DETAILED ACTION**

The applicant's remarks, see remarks, filed 06/02/2005, with respect to the double patenting rejection have been fully considered and are persuasive. The double patenting rejection has been withdrawn.

### ***Election/Restrictions***

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-15, and 26-29 are drawn to a process or enabling multistage decision making in preflight dispatch, classified in class 701, subclasses 29, and 61.
- II. Claims 16-25, drawn to an apparatus of enabling multistage decision making in preflight dispatch of a mobile platform, classified in class 701, subclass 33.

The inventions I and II are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case, the process as claimed can be practiced by a materially different apparatus or by hand, such as the conventionally disclosed process wherein mechanics evaluate central maintenance computers (CMCs) and performs the needed maintenance (see applicant's disclosure).

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Upon election of invention I or II, the applicant is further required under 35 U.S.C 121 to elect one of the following disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable (currently, no claims are generic):

- A.The extended VOI diagnostic model based on a Bayesian network.
- B.The extended VOI diagnostic model based on a neural network.
- C. The extended VOI diagnostic model based on fuzzy logic.
- D. The extended VOI diagnostic model based on expert systems.

Upon election of species A, B, C, or D, the applicant is further required under 35 U.S.C. 121 to elect one of the following disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable (currently, no claims are generic):

- a.Embodiment wherein the VOI diagnostic model is constructed based on systemic information only.
- b. Embodiment wherein the experience-based information only.
- c. Embodiment wherein the factual information only.
- d.Embodiment wherein the systemic and experience-based information only.
- e.Embodiment wherein the systemic and factual information only.
- f.Embodiment wherein the experience and factual information only.

g. Embodiment wherein the systemic, experience and factual information only.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
